Profile Summary

Dynamic IT professional with 3.9 years of hands-on experience, specializing in Salesforce solution design, implementation, and customization. With 1.9 years dedicated specifically to Salesforce development, I have demonstrated expertise in driving business growth and optimizing operational efficiency through tailored Salesforce solutions. Proficient in Apex programming, Lightning components, and adept at customizing Salesforce applications to meet diverse business needs.

Experience

- **Salesforce Developer | Jarvis Business Solutions**   *(Oct '22 - present)*
  - Successfully integrated the company's database with Salesforce, Connecting **Order Management system (OMS)** and **Commerce Cloud**.
  - Developed and implemented **Apex Classes**, Triggers, **Interfaces**, **Batch Classes**, and Schedulers to streamline and automate Stocks present in inventory.
  - Enhanced the user interface by developing **Lightning web components**, contributing to an improved overall user experience.
  - Implemented and configured **Salesforce Loyalty Management** module to streamline customer loyalty programs and enhance user engagement.
  - Utilized **Git** commands and tools to **track changes**, create branches, merge code, and resolve conflicts in multi-developer environments.

- **Salesforce Developer intern | Quality Pat**   *(May 22 – july22)*
  - Engaged in the configuration and **customization** of Salesforce objects, fields, workflows, and validation rules to align with precise business needs.
  - Assisted senior Salesforce developers in the design and implementation of custom **Apex triggers** and classes,contributing to the automation of critical business processes.
  - Expanded collaborative efforts to enhance overall system functionality and user satisfaction.

- **Gvpr Engineers ltd**   *(Sept' 21– April '22)*
  - Quantity surveyor as a estimation of work done   and execution of clients based upon billing

- **Megha Engineering & Infra structure – Meil**   *(May '19 – Sept '21)*
  - **Erp Tool** Used for Project Detailing and Analyzing , interacting to clients and Customers using data Modifications.
